

Analyst and Investor Day

◆ September 15, 2026

Katie White

→ Senior Director, Investor Relations

Safe Harbor

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained in this presentation other than statements of historical facts, including any statements regarding our future results of operations and financial position, our business strategy and plans, and our objectives for future operations, are forward-looking statements. The words "may," "will," "could," "would," "should," "expect," "plan," "assume," "anticipate," "intend," "believe," "estimate," "predict," "potential," "outlook," "guidance," "target," "goal," "project," "continue to," "confident," or the negative of those terms, and similar expressions are intended to identify forward-looking statements. These forward-looking statements are subject to risks and uncertainties and are based on our assumptions as to the macroeconomic, political and regulatory environment today, and reflect management's current expectations and beliefs based on factors currently known to us. Actual results may differ materially from those contained in any forward-looking statements. It is not possible for management to predict all risks, nor can we assess the impact of all factors on our business. Workiva cautions that these forward-looking statements are not guarantees of future performance. Please refer to documents filed with the Securities and Exchange Commission, including the company's annual reports filed on Form 10-K and quarterly reports on Form 10-Q, particularly the sections captioned "Risk Factors," and any amendments thereto for a discussion of certain important risk factors that relate to forward-looking statements contained in this presentation that may cause our actual results to differ materially.

All forward-looking statements are made as of September 15, 2026, and reflect our current expectations only. We undertake no obligation to update or revise these statements to conform to actual results or revised expectations, except as required by law.

By reviewing this presentation, you acknowledge that you will be solely responsible for your own assessment of the market and our market position and that you will conduct your own analysis and be solely responsible for forming your own view of the potential future performance of our business.

TeamAudit logPreviewReport detail

Setup is confirmed — here's where the filing stands coming out of the prior-year reuse.

Mapping: 149 field instances mapped automatically from the FY2024 BE-11 package. 3 exceptions couldn't resolve to a system of record and were routed to collection.

Collection: 21 requests across 20 tasks were sent to 4 prior-year providers. All 21 prior-year responses and their evidence packages were carried forward, re-verified against the FY2025 filing, and accepted — **0 requests outstanding**.

Nothing new was chased. The prior-year record was clean enough to reuse in full.

Collection is complete and ready to lock. **Confirm data collection** to close this stage and move into validation.

P2P-C04 Three-Way Match – invoices paid for quantities above the goods receipt

Draft

P2P-C04 · Q1 2026 audit · 4 exceptions · \$18,584 overpaid

Drafted by Workiva AI · 9:07 am

ISSUE DESCRIPTION

Control P2P-C04 requires each vendor invoice to agree to the approved purchase order and to the recorded goods receipt before payment is released. Testing of eight interim samples identified four – S-003, S-005, S-007 and S-008 – where the invoiced quantity exceeded the quantity recorded on the goods receipt and the invoice was paid in full. Each variance cleared the ERP three-way match without an override approval, and \$18,584 was paid for units that were never received.

ROOT CAUSE

The quantity-match tolerance for MRO purchase orders was raised from 2% to 10% on Feb 12, 2026 under change CHG-5182. Every quantity variance in the sample falls inside 10%, so the ERP matched and released each invoice for payment without routing it for override approval. The change was not flagged for control impact review, and no detective report compares invoiced quantity to received quantity after payment.

SEVERITY

Low confidence

High

ACTION PLAN

TP

Reset the quantity-match tolerance to 2% on MRO purchase orders

Jul 18, 2026

DW

Recover \$18,584 overbilled from the three affected vendors

Aug 14, 2026

AS

Re-perform the three-way match on the four exceptions after the reset

Sep 5, 2026

Root cause

Here is how I traced the cause.

The four variances run from 5.0% to 8.3% – all of them would have been blocked at the 2% tolerance and all of them clear at 10%. CHG-5182 deployed on Feb 12 and no failure pre-dates it. The change record carries no control impact assessment, which is the procedural gap that let it through.

Change management

Change	CHG-5182
Deployed	Feb 12, 2026
Quantity tolerance	2% raised to 10%
Impact review	Not performed

CHG-5182, Feb 12

2% raised to 10%

No impact review

The tolerance history and the variance percentages line up exactly. I would still confirm the intended scope with the change owner.
